

# Shelter Medicine 101 Lecture Seven: Housing Design to reduce stress

## Lecturer(s):

Dr. Denae Wagner

## Date Presented:

05/13/2011

## Summary:

## Recommended reading:

Griffin, Brenda (2009) Section 1: Chapter 2 **Wellness** In Miller, L & Hurley. KF (Eds.), Infectious Disease Management in Animal Shelters(pp. 17-38) Ames, Iowa: Wiley-Blackwell

Association of Shelter Veterinarians (2010) **Facility Design and Environment** In ASV (Eds.) Guidelines for Standards of Care in Animal Shelters (pp 13-17) Camas, WA Self Published

Both the Infectious Disease Management in Animal Shelters textbook and the Shelter Medicine for Veterinarians and Staff textbook are on reserve in the Carlson Health Library. Each book is also available for purchase at your preferred bookstore:

- [Infectious Disease Management in Animal Shelters](#)
- [Shelter Medicine for Veterinarians and Staff](#)

Housing is a key factor in animal health and wellbeing. Inadequate housing can undermine many progressive animal care practices. Housing design and animal care and management will be discussed as it relates to stress and stress reduction in veterinary practice and animal shelters.
